

Reconditioned Laboratory Parts & Equipment

Reconditioned Parts and Exchange

At LC Services, we provide reconditioned and exchange parts and equipment to laboratories and companies around the world, helping you save money, reduce downtime, and increase the lifespan of your equipment.

All our parts are tested to OEM (original equipment manufacturer) performance standards and thoroughly inspected by our expert team.

We offer refurbished and exchange parts on a whole host of brands and models for HPLC & GCMS equipment, including Agilent, Waters, Perkin Elmer, and more.

Agilent 1100 MCGV

Edwards E2M28 Rough Pump

Water Acquity UPLC Actuator

Waters 2487 Low Voltage Powers Supply

Akta UV-900 Lamp

Waters Acquity BSM PCB

How does our exchange parts programme work?

We make exchanging and purchasing reconditioned parts as easy as possible for you.

Our reconditioned parts come with 6-months warranty to give you peace of mind. Customers can purchase reconditioned parts without having to do an exchange if they don't have an item to return.

To exchange goods, simply purchase a reconditioned part and send us your faulty one. Once received, we'll then credit you the difference against a future purchase or refund the difference.

What are the benefits?

- ✓ Save money**
Refurbished parts cost less (can be up to 70% cheaper)
- ✓ Extended lifespan**
Keep your equipment working accurately for longer
- ✓ High quality**
We provide 6-months warranty on all parts
- ✓ Fast delivery**
Parts often arrive in less than a week to labs in the UK (if already in stock)
- ✓ Reduce waste**
Reconditioned parts are better for the environment
